Extended Data Fig. 7 | Metabolic-labeling reference: scNT-seq. a, UMAP annotation of 1,947 scNT-seq cells, colored by cell type. **b,** Velocity streams for the dynamo metabolic-labeling reference and all 19 method configurations, arranged in five columns. **c,** Per-cell cosine similarity to the metabolic-labeling reference. Numbers below method names in the stream panels are the median per-cell reference-direction cosines, shown to three decimal places. Boxes show the median and interquartile range, with 1.5-IQR whiskers and outliers; methods are ordered by median. All 19 configurations use barcode-aligned cells and the same reference coordinates. Cosines were calculated from the displayed per-cell directions.
