Extended Data Fig. 3 | Real-world benchmark datasets

Overview of benchmark datasets. a, Original UMAP/t-SNE illustrations of ten classical datasets, colored by cell type or time point. b, Two HuBMAP examples colored by CytoTRACE2 developmental potential. These historical input illustrations are retained; updated quantitative method comparisons are presented in Extended Data Fig. 6. Full spatial and KPTracer datasets are shown separately in Extended Data Figs. 9 and 11.
